

## Ledger Logic Bookkeeping LLC

We handle the books so you can build your business.

### **Five Things That Could Be Costing You Money**

#### **1. You're behind on monthly reconciliation**

Unreconciled accounts distort cash flow and hide errors.

#### **2. You don't actually know your true profit**

Misclassification leads to bad pricing and tax surprises.

#### **3. Personal and business transactions are mixed**

This increases cleanup costs and audit exposure.

#### **4. Invoices and bills aren't actively tracked**

Cash flow problems usually start here.

#### **5. Your books haven't been professionally reviewed in 6+ months**

Small errors compound quietly.

#### **My Recommendation**

Schedule a free bookkeeping health review. We review your current setup and explain what's working, what isn't, where the risks are, what ongoing monthly bookkeeping oversight, review, and guidance would look like, and what it realistically costs to get your books where they need to be. This includes hands-on corrections and proper categorization so your financial reports support smarter decisions as your business grows—regaining your valuable time and peace of mind.
